

What happens when...

What happens when...

Technology disrupt your company

Customers turn to competitors

Industry Trends starts turning

We can solve this via **JumpStart.**

JumpStart is Asia's first centralized
Corporate Innovation Outpost

Our platform is open to global corporations expanding into Asia to tap into the regional innovation clusters to seek out Potential Threats and Opportunities in Disruptive Technologies.

Leveraging the regional start-up, industry and academic ecosystems, we help to convert enterprising ideas by local start-ups and entrepreneurs into new or improved products, processes or business models for our partnering companies.

Project #1: Big Data
Date: 30 March 2016

What do you do with 100 million users?

Mafengwo (MFW) is a Big Data Company in E-Tourism industry and commands monthly 100 million active FIT user in China.

MAFENGWO'S OPPORTUNITIES

MFW is rapidly expanding globally and is looking at partners who have strong local domain know-how & able to increase their revenue stream and strong big data analytical skills or technologies.

Partners can leverage on MFW's customers and data to grow and become MFW's partner for regional expansion.

LOCAL PARTNERS OPPORTUNITIES (EXAMPLES)

Research Institutions (IHL) such as A*Star are partnering to gain massive data sampling to help in research and data crunching.

Local partners such as CityTours are benefiting from the 100m user base by becoming MFW's aggregator for vendors and english content in the SE Asia region.

Project #1: Robotics
Date: 1 June 2016

How do you work with SMART Robot?

Ninebot/Segway, is an international unicorn and owns 95% of world's gyro technology when they acquire Segway in 2015. They recently announced Intel/Xiaomi collaboration for first home robot.

NINEBOT'S OPPORTUNITIES

Ninebot is constantly looking for engineering capabilities to improve, innovate and invent new robotic technologies.

Through JumpStart, Ninebot can reach out to more academic and R&D resources to complement their existing resources to make Ninebot the default platform for two wheeler transportation and robotics.

LOCAL PARTNERS OPPORTUNITIES (EXAMPLES)

The new home robot by Segway which was collectively launched by Intel CEO during Las Vegas CES 2016 is an open platform where Ninebot can open its platform to developers around the world. Please see the announcement @:
